

ROOFING SERVICES

The Company

BPS Facilities Roofing division are specialists in Roofing Maintenance – Refurbishment and New Roof Construction working in partnership with a wide range of customers throughout the UK.. Our staff are fully trained and we provide a high standard of workmanship resulting in repeat business and satisfied customers.

Roofing Emergency & Maintenance Works

We provide an Emergency service 365 days per year, 24/7 for our customers via our call centre and Help Desk. All jobs are registered, activated and then allocated to our trained operatives for attendance. Each job is recorded with details of the repair, material specifications and site details such as access arrangements and safety procedures.

Roofing Refurbishment & Construction Services

A specification service is provided by BPS Facilities Ltd for all roof systems whether the roof requires refurbishment or a new roof construction. Products and materials are carefully evaluated for their application, performance and environmental impact BPS Facilities Ltd operate a policy of high workmanship standards and compliance with current industry/building regulations for all roof installations.

Benefits of Roof Maintenance

- Full compliance with safety standards.
- Full job record history.
- Minor defects can be the cause of most roofing leaks, regular maintenance/inspections help prolong roof lifespan & performance.
- Planned roofing maintenance such as roof outlet & gutter cleaning; roof flashing inspections can help identify early stage roof maintenance issues before they develop.
